Educational program

Our teaching methodology for foreign students is focused on communicative skills. With this course, we pretend that students can achieve an independent learning. Our aim is to socialize and settle students, motivating them towards a general learning. We are also going to make them understand that the new language (Spanish) is a link between them and the environment around in order to minimize the culture shock.

The method of our teaching center is systematically based on practicing the language with the main four skills: comprehension, conversation, reading and writing.

We will pay a special attention to the conversation skills, in order to get as quick as possible enough assurance to communicate and understand Spanish. We work with recreational and participative activities so each student can develop communicative skills through the Spanish language.

This course is designed with an original system, according to the needs of ELE teachers. This system is based on dynamism and current topics.

Each issue has the support of new tools and technologies in order to motivate the student's integration in the learning process.

All the contents taught, are adapted following the "Instituto Cervantes' " curricular syllabus in the levels established by the Common European Framework (A1, A2 and B1).

Timetable

The programme of the course is shown on the following table with the everyday planning. As you can see, apart from the academic duties, you will find other leisure and free time activities to enjoy our sightseen, culture and cuisine.

What do we offer?

If you want to improve your Spanish, **we can** offer you this possibility in our “Spanish culture and language International Center”, located in Casar de Cáceres (South West of Spain).

Teaching methodology

The method used is based on the communicative skills. We pretend that students can manage with the new language in some different situations, such as with a family or with some job or professional duties. Our methodology of language immersion and the daily coexistence with the leisure activities, guarantees an ideal way of learning.

Language immersion

The Language Immersion makes possible that students develop the Spanish language due to the study, knowledge and practice with other students. So, all the outside of class activities programmed, become really important in the learning process, because through them students can know and study our culture, costumes and useful expressions deeply.

Trips

Casar de Cáceres is located in an strategic area: 10 kms from Cáceres city (which is a World Heritage City) and very close form Mérida (World Heritage also).

“La Vera” Region is a historic border place, but above all, is a trip to the native nature of the region. There you could look at the routes and paths of some of the most famous ravines in the Spanish Peninsula (this area belongs to the Tiétar River).

The student will have the opportunity of visiting some villages, the Yuste’s Monastery and the German cementery. All these places will give to people the opportunity of going back in time, specifically when Carlos I was the European Emperor (16th Century).

The visits programmed are good for students to know different cultures which are a value added in the learning process.

What is included in this course?

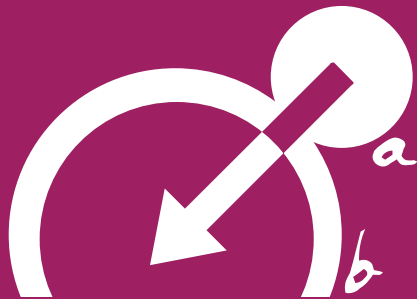

- ~ Transfer from and to Madrid or Seville’s airports.
- ~ Stay in a double room with full board.
- ~ “Coworking area”, that means, Wireless fidelity (Wifi) and other information technologies and new tools.
- ~ Limited groups (maximum 10 students per class)
- ~ Common European Framework Levels: A1, A2, B1 and B1 +.
- ~ Enrolment and teaching materials are included in the price.
- ~ Language immersion activities (Actividades de inmersión lingüística)

Cultural trips to the most important and touristic cities around Extremadura.

Leisure and free time activities in the locality of “El Casar de Cáceres” (including gastronomy and craftsmanship workshops)

- ~ “Course completion certificate” . Preparation for obtaining DELE (certificate in Spanish as a foreign Language)

Our academic center building is located in "Casar de Cáceres" (Cáceres). It is placed in a peculiar and friendly area that can combine rural areas with technology. This is the perfect place for offering continuous and participative learning of the Spanish as foreign language.

The building facilities in the academic building, the social building and the dormitory building are very close to each other. All of them have areas thought for the open learning of a foreign language and new experiences.

These buildings are also near of a sports center, so students can join them as a complement the other course's activities.
